

RAHUL SHIVLAL JANGID

MERN Stack Developer | Backend Developer (Node.js, Express.js)

Pune, Maharashtra | +91-9404847516 | rahuljangid.scoe.entc@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFILE SUMMARY

Final-year Electronics & Telecommunication Engineering student (8.6/10 CGPA, Sinhgad College of Engineering, Pune) seeking backend and full-stack software engineering roles. Built 3 production-grade applications spanning the MERN stack and Python/FastAPI, featuring authentication, RESTful API design, automated document processing, and data-driven dashboards. Proficient in MVC architecture, MongoDB Atlas, and Express.js; comfortable picking up new stacks quickly and shipping working software, most recently using AI-assisted development to deliver a full-stack Python automation tool outside my core stack.

SKILLS

Languages: JavaScript, TypeScript, Java, SQL

Backend: Node.js, Express.js, REST API Design, Passport.js (Authentication & Authorization)

Frontend: React.js, HTML5, CSS3, Bootstrap, Responsive Design

Databases: MongoDB (Atlas), PostgreSQL, MySQL, Mongoose

Tools & Platforms: Git, GitHub, Render, Cloudinary, Postman, VS Code

Concepts: MVC Architecture, Session Management, Database Schema Design, RESTful Services, PDF Parsing & Data Automation

EDUCATION

B.E. – Electronics and Telecommunication

2023 – 2027

Sinhgad College of Engineering, Pune | CGPA: 8.6/10 (till 6th Semester)

- Java Course [Certificate](#)
- Web Development (MERN Stack) [Certificate](#)

PROJECTS

Wanderlust (Airbnb Clone)

Tech: Node.js, Express.js, MongoDB, EJS, Passport.js, Cloudinary

- Built a full-stack web application following MVC architecture
- Implemented user authentication using Passport.js and session management
- Developed RESTful APIs for listings and reviews
- Integrated Cloudinary for image upload and storage
- Handled CRUD operations with backend validation
- Deployed application on Render with MongoDB Atlas

Result Analysis Automation (PDF-to-Excel Result Processing System)

Tech: Python, FastAPI, pdfplumber, pandas, openpyxl, Chart.js, Jinja2

- Built a full-stack automation tool that converts SPPU university result-ledger PDFs into structured Excel reports and an interactive analytics dashboard, replacing manual faculty data entry
- Engineered a custom regex-based parsing engine (pdfplumber) to extract seat numbers, student names, SGPA, and subject-wise marks from unstructured, multi-format PDF ledgers, including automatic merging of split subject rows
- Automated multi-sheet Excel generation (pandas, openpyxl) with raw student data plus subject-wise, grade-distribution, and overall pass/fail analysis tables, styled with professional formatting
- Designed a FastAPI + Jinja2 + Chart.js dashboard surfacing pass/fail/AB breakdowns, subject-wise failure rates, and hardest/easiest subject insights
- Self-directed the entire build in a stack outside primary expertise (Python/FastAPI) using AI-assisted development, going from spec to a working deployed tool independently

ACHIEVEMENTS AND ACTIVITIES

- Solved 100+ DSA problems on [LeetCode](#)
- SQL (Intermediate) Certification - [HackerRank](#)
- Academic Excellence: Maintained 8.6/10 CGPA
